River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Humboldt County:

- **Mad River at Arcata is forecast to crest at 22.1 feet the evening of 01/10/17.**
 - Potential Impacts: Significant flooding of portions of Mad River Beach Road and adjacent farm lands is likely. May cause water to flow across roads to Tyee City. High tides and strong onshore winds will aggravate flood impacts.
- **Eel River at Fernbridge is forecast to crest at 24.4 feet the morning of 01/11/17.**
 - Potential Impacts: Minor flooding of Highway 211 to Ferndale south of Fernbridge. Much of the Eel Delta may be flooded, including areas northwest of Loleta, the western portion of Cannibal Island Road. Flooding will be enhanced for longer duration events. A Special Action Advisory is being issued to all owners of livestock in areas adjacent to the Eel River and other low-lying areas. These animals are at risk due to river rises and appropriate action should be considered.
- **Van Duzen River at Bridgeville is forecast to crest at 18.8 feet the evening of 01/10/17.**
 - Potential Impacts: Flooding of Highway 36 near Grizzly Creek State Park and along River Bar Road in the Starvation Flats area. Water level at the State Park reaches the parking lot.

Mendocino County:

- **Navarro River at Navarro is forecast to crest at 34.3 feet the morning of 01/11/17.**
 - Potential Impacts: Significant flooding over the south bank approximately 1 mile east of Highway 1, and damage to property including 6 homes is possible. Expect closure of Highway 128. Motorists should use alternative routes.
- **Russian River at Hopland is forecast to crest at 25.0 feet the evening of 01/10/17.**
 - Potential Impacts: Severe bank erosion is likely with widespread flooding of farm land, buildings and low-lying homes in the Hopland, Ukiah, and Talmage areas. Many secondary roads will be flooded. This level of flooding caused 6100 acres to flood in February 1940.

Sonoma County:

- **Russian River at Guerneville is forecast to crest at 37.5 feet the evening of 01/11/17.**
 - Potential Impacts: Significant flooding can be expected throughout the lower portions of the Russian River. Mirable Park will be flooded. Mirabel Road is expected to flood at River Road. Rio Nido village is forecast to begin flooding. River Road east of Guerneville and River Boulevard east of Monte Rio are expected to flood.

WEATHER SYNOPSIS BY REGION

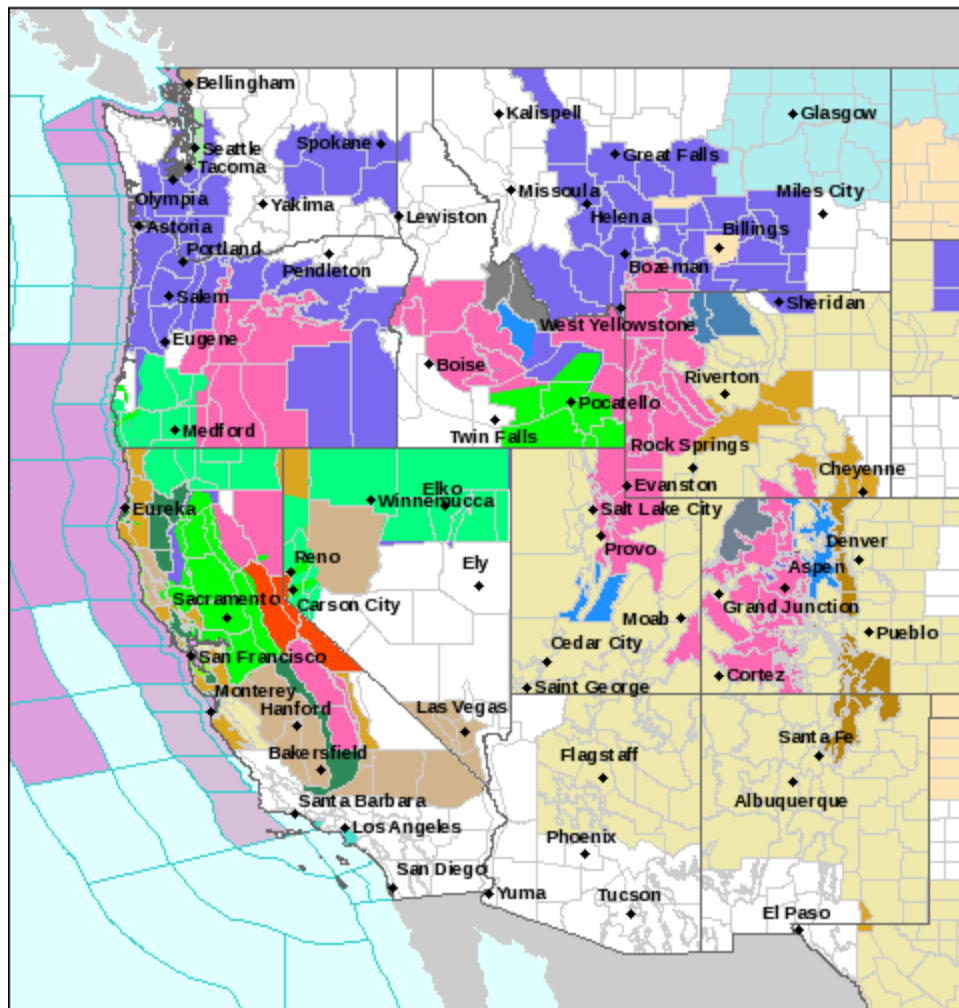

NORTHERN CALIFORNIA

Strong southerly winds will develop overnight into Tuesday with many areas seeing speeds of 10-25 mph with gusts of 30-45 mph common, and locally stronger gusts probable. A break in the weather is expected to develop late Wednesday and last into the weekend before more wet weather arrives next week. Snow levels over the next few days will be variable, but mostly from 3000-4000 feet in the north and 5000-6000 feet in the south. Significant amounts of mountain snow accumulation are expected again/will continue. With the strong winds expected soon, the possibility of trees blowing over or large limbs snapping off will also continue. Travel through the mountains will become difficult in many areas as well through mid-week. Drier weather is expected Thursday and Friday in all areas, Saturday may see some light showers in some areas, and the NW portion of the region will probably see precipitation return later Sunday into next Monday. Another major winter storm will possibly arrive about the middle of next week.

SOUTHERN CALIFORNIA

One storm will be exiting the region today, but two more storms will bring periods of rain through Thursday evening. Scattered showers will be possible between storms. Most foothill and mountain locations across Central California will receive an additional 4 to 8 inches of rainfall through Thursday, while most coastal and valley locations receive an additional 1 and 4 inches of rainfall. Most foothill and mountain locations across Southern California will receive 2 to 4 inches of additional rainfall through Thursday, while most coastal and valley locations receive an additional 1 to 2 inches. The snow level will be between 7,000 and 8,000 feet through Tuesday and then drop to 5,000 to 6,000 feet Wednesday and Thursday. Strong south to west winds will continue to surface across the mountain ridges and desert passes through Thursday morning. Maximum temperatures will be below normal through Thursday, with most mountain locations in the upper 30s and 40s and most valley locations in the 50s to low 60s. A ridge of high pressure will build into California from the Pacific Ocean Friday through this weekend bringing a warming and drying trend to the region. North to northeast winds of 15 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California Friday morning through Sunday morning.
